Local man plans to sue Avatar

VANCOUVER: Alleges film's director, James Cameron, infringed on his script's copyright

BY LORA GRINDLAY
STAFF REPORTER

A Vancouver restaurant owner plans to file suit in B.C. Supreme Court today, claiming copyright infringement against the makers of the highest-grossing film of all time, *Avatar*.

Emil Malak, 57, says the similarities between his *Terra Incognita* and James Cameron's *Avatar* are too striking to simply be a coincidence.

Malak's lawyer, Suzan El-Khatib, said the claim is to be filed today will name, among others, *Avatar* writer and director James Cameron, his company, Lightstorm Entertainment Inc., and 20th Century Fox Film Corp.

El-Khatib said there are both general and specific similarities in the two stories. Including the premise of humans going to mine precious minerals on a planet inhabited by indigenous people.

In both stories, she said, a tree is a focal point and contains the collective memories of the indigenous people. In *Terra Incognita* it is a Life Tree. Cameron calls it the Home-tree.

Even the characters are similar, she said, with both incorporating spotted faces, long braided hair, flat noses and yellow eyes.

"They are quite alike," El-Khatib said Sunday.

She said the lawsuit will make a claim against the defendants for "damages for copyright infringement for substantially reproducing, adapting and publicly presenting, or in the alternative authorizing such acts, the plaintiff's work as a literary work and a cinematographic work entitled *Avatar*."

Malak, who owns the Bellaggio Cafe at Hornby and Robson streets, began thinking about his sci-fi tale in 1996 at the suggestion of his then-seven- and eight-year-old sons, who wanted him to write something more exciting than the opera and historical fiction he'd been working on.

It was a turning point in Malak's life. In 1996, he lost his Granville Island Hotel in a \$5-million bankruptcy.

"I took a three-year sabbatical. I lived on about \$200 to \$300 a month. I stayed with my brother in Richmond and did nothing but write," said Malak.

He began putting pen to paper for what he calls his "children's story" in 1997 and in the end he figures he spent \$100,000 on his script.

He hired a graphic artist to draw his character designs and a screenwriter to co-write the script. He took a

Emil Malak put up a display Sunday at his Vancouver restaurant, the Bellaggio Cafe on Hornby Street, showing the similarities between his screenplay and James Cameron's *Avatar*. Malak is filing a writ against Cameron today. WARD PERRIN PHOTOS — PNG

Emil Malak's drawing on the right, with the *Avatar* character on the left.

screenwriting course and first copyrighted his work with the Writers Guild of Canada in 1998. He copyrighted it with the guild nine more

times between 1998 and 2003, every time he advanced the story and characters.

In a Feb. 27, 1998, note filed with

his documents at the Writers Guild of Canada, he wrote that he was copyrighting his work because he was "afraid of the big boys."

By the numbers

Avatar

- Production cost: \$237 million.
- Marketing cost: \$123 million.
- Opening weekend box office: \$80 million.
- Domestic box office at March 7, 2010: \$720 million.
- International box office at March 7, 2010: \$1.8 billion.
- Total box office at March 7, 2010: \$2.56 billion.
- Highest-grossing film of all time: *Avatar*.
- Number of people who saw *Avatar* (iTunes teaser trailer on opening day): Four million.

"I had just lost Granville Island [and] lost \$5 million so you become very intuitive. You don't trust anybody," said Malak.

"I was so scared someone was going to steal it."

Malak, who was born in Egypt, educated in England and moved to Canada in 1993, believes it was October 2002 when he sent his script and graphic designs to about 20 movie studios, including Cameron and his company, Lightstorm Entertainment Inc.

He got no response and the script was never returned to him. Malak was stunned to learn of the similarities between his story and *Avatar* when the movie was released late last year.

Malak told *The Province* he believes that Cameron had an idea similar to his — to write about indigenous people on another planet — but there's no way to account for stories that are up to 60-per-cent similar in his opinion.

"Is it possible that two ends can come up with so much similarities? Life Tree, same mining material just called different names, the tails?" said Malak.

"The basic building blocks of both stories are very similar."

In the end Malak believes *Avatar* was shaped in part by his story and he is filing the B.C. Supreme Court writ today because he wants it to be known.

He insists it's not about the money.

"I eat three times a day. I have a great life," he said.

"The big boys have to recognize you can't just take things and make it a part of yours and walk all over the small guys."

"In my own heart I'm very happy and very comfortable that my vision has become a blockbuster."

it decided
it's his last presentation before retiring

Spelling, documentary about the ①

ERRA INCOGNITA

To be followed by a series like "PLANET of the Apes"

Rabbi Imam Weiss have just recovered from a Kidney stone operation. At the age of ninety one he decided that it was time to go into retirement, where he could write and spend more time with Julia. He had one last job that he very much wanted to achieve. During his operation he recalled a very real dream that lasted for almost three consecutive days while he was recovering after the surgery.

At home he got his address changed and
"Hello, it's Rabbi Imam Weiss, it's Mr Spielberg and Steven Spielberg was a well known producer, but the Rabbi performed his marriage ceremony and since then they became good friends and met at least once a year for a couple of days where they both exchanged various views and vision of the world."
"How is my friend reparation, did you get my package" said Steve
"I did it was a great movie, I became very attached to the character E.T."

"I am going to be in Israel next week, I will have to see you, is there anything you need from America?" said R

"Well I am glad you are visiting, I need to spend at least a day with you, there is an idea that I would very much like your opinion and possibly see if it can be developed."

Week later Mr Spielberg, one day visit lasted to about two weeks he became very excited on what the Rabbi have for before him.

"I am going to raise the finances in order to create the movie this is definitely a winner, what a great follow up to E.T. Don't you know, it was only a dream, but I personally believe we can learn a lot from it and I am glad that you saw my vision and you are prepared to develop it into a movie screen"

(2)

Three months later one of the Major Hollywood Studios have picked up the screen play that writer and Rabbi imam have put together.

It all happened on an island in the Pacific where all the Actors and crew stayed there for the whole of the filming which took 24 months, as usually the budget was over run by FIFTY percent but when the financiers and backers saw what was the movie all about, they had no problem in sanctioning the extra \$ money.

The first showing was made in New York where many celebrities but in particular politicians, diplomats and the United States President accepted the invitation. The United Nations assembly room was transferred to a movie theatre where the premier was being first shown.

Very diplomats, ambassadors made sure they attended, of course it was quite a change for them to mix with all these famous actors and movies producers. They considered the showings as fun, Hollywood affairs, brought their wives and some managed to get extra tickets in order to invite their daughters and sons to this famous gathering. Now the pre movie drinks, cocktails.

Prior to the movie being presented, Mr. Spulberg stood up as an esteemed delegate, President, diplomats and movie people. You must all be wondering, is that a follow up to E.T. I can tell you for sure No. It is a follow up to my dear friend Rabbi Imam Weiss' dream while he was in hospital. I hope you and us will enjoy the movie and I am going to let Rabbi Imam say what he thinks after the movie is shown. The room assembly room darkened and the projector started a man of almost ninety one years old, who was actually our Rabbi Imam, was asleep by a lake.

(3)

His arms stretched and he opened his eyes suddenly the colour on the screens totally changed. You were no longer watching the normal colour you saw on earth.

Rabbi more than once waked his eyes to make sure he was awake, he even pinched himself so he is no dreaming. 'Oh my God, where am I, what's this place, look at the colour of the branches on the trees, not green anymore. Each branch had ~~the~~ Four distinct colours, Black, white, brown and yellow. The each branch differed from the other only when one of the colours was predominant but by all still had the combination of the other three colour. The Rabbi stood up and walked towards the tree who also had the combination of the four colours. He touched one of the branches, it felt the same as those on earth, this one had a majority of yellow with the other three colour uneven, the next branch had Brown as the majority plus the other three colours and so on.

When he turned around he noticed the earth, same texture as seen when he touched but it also seems to have the mixture of the four colours - one patch will have more white sand and the other three, then tenth area more black in the other three, imbedded in the majority colour. It looked extremely attractive. The Rabbi kept on wandering, he felt rather hungry, in the near distance he noticed some fruit trees and saw some strange looking birds jumping from one tree to another or climbing. Very carefully he walked toward the orchard all these birds alarmed just disappeared making some noise noise that seemed familiar to him. When he looked up, it was an apple tree, he smiled but was rather instantly the apple once again had the combination of the four colours, Black, brown, white and the yellow. Each apple was distinct

(4)

different by having one colour as the dominant but still carries the other three colours. He Focused, to pick the one with yellow as the predominant. Hesitantly he took a bite, and started to carefully and slowly chew.

Oh, my God this apple taste delicious, when he finished he walked over and took a Banana, that had black as the predominant colour, once again it taste Fine. After tasting a few more fruits, he was now Full, and decided to walk over to the lake which was over FIFTY Feet away and murmured to Himself, I wouldn't mind to taste the water. When he got to the lake, once again it looked like a velvet bed of white surface and lying in between the other three colours, black, brown, and yellow. He tried the water, it was fresh and delicious, he then noticed some FISH swimming they all had the same combination of colours.

He shouted out loud Hoping some Humans will hear Him.

"Anyone Here, please answer me, I am Rabbi Imam Was over half a dozen times, he could hear the echo of his voice on the distance." - a few minutes later while Rabbi was wondering around checking the place. he heard

"HEL, HEL, Hello" extremely curious he turned around and followed the sound. out of the bushes appeared a tall, almost six foot figure. They both stood staring at one another for a couple of minutes.

Oh, Oh, you look very strange who are you, why are you so different to me. said Rabbi

"I am "AREH, KHUFU", "Lull"

"Arch what" said Rabbi

AREH KHUFU

quite a long name, does it mean anything, I am

Puzzled just looking at you, please don't take that the wrong way, I don't mean to offend you but you look so different to us."

Yes to your first question, my name does have a meaning to your earth people. The first Half Archi comes from Archimedes you first great famous mathematician who lived around 290 BC. He was a great inventor and invented a device for raising water, called "Archimedes' Screw" and also the two astronomical globes, can you guess the other half? And Archi ~~what about~~ KHUFU, KHUFU, oh yes of course that's pharaoh Khufu, the Egyptian royal king, to have built the first pyramid in Giza, near Cairo, he was buried there. And Rabbi yes, you are right, most of our names represent two departed spirits from your world.

Are you a scientist or an, a, I mean a pharaoh.

No, I am an engineer specializing in Building, and Highways. Oh, I see, it's a kind of an honor that your name follows in a sense into you are representing." said Rabbi.

It doesn't work this way all the time, it depends on your effort.

I am glad you said that otherwise, it would really be a bad luck if you are named after Akopuffer. You know what I mean, Akopone and the upper, two men, two men, they both started to laugh.

I can assure you we keep away from these names, we have a booklet of names that once we have a baby born, for the first four weeks the father, the mother and both sides parents exchange various conversation and discuss and carefully watch the child character then choose a name after two people that hopefully he will be blessed in his growing up years to follow up his career, or at least one. If he turns up

totally different, that means that they have totally Failed in their judgments, and they have to live with it. In most cases, their continued effort succeed to achieve what they have chosen you both would, oh, sorry I mean really different, why's half of your Face seems to be split in the middle like a colour painting. one eye is like a greek god, with wide brown colour, the half of your Face is ~~olive~~ skin like Snow skin, while the other half of your Face is almond eyes like a pthorah with dark brown, almost olive skin!

the Architectura stood silent and look at me, suddenly jumped with excitement as if I solved the puzzle.

"oh, only me, you represent the greek archimedes and the other half of your Face present pthorah Khtu, man I get it. My eyes started to wander down from his Face, now this was becoming really interesting. I noticed that he had some shorts and a short sleeve shirt. His arms were both noticeably different in color one was totally black, the other yellow, while the fingers had the four different colour, but I noticed the FIFTH finger on his hand was the same as his hair colour which was ~~Black~~ Brown. Why is it that your thumb and one finger are the same color of Brown as your Hair?"

It's simple, the dominant color that I am made of is the Brown, Egyptian skin color therefore the hair follows it, and it covers at least one third of the body while the other two covers the 2/3 of the bodies. "Tot"

To be honest I was fascinated by what I was learning from my new found friend Akhe Khtu.

What do you do for living?

I am what you may call the Mayor of a small medium size town. our system is based on similar foundations.

Yours best we seemed to have applied different rules and regulations
'How long am I to stay with you?' asked the Rabbi.
'I believe you are our guest for one week. I will be showing
and explaining to you the ways of our planet.'

Are you telling me that I am on a different planet than earth?
You are a visitor on Terra Incognita, and you would be
'Call the band of the Uncharted, we really mean Unexplored
of earth people. We so far from our own world have managed
to reach your world and we intend to stay that way. As a
matter of fact once you return back to earth, we will be on our
way Tens of millions of miles away so your race will never be able
to find us. Please take as much as you can from our ways as
hopefully earth people can learn from our world. We are lucky, they
are Advanced Computerized Technology we have managed to take
they move you make on earth. We can listen up on all your
conversations, your various countries leaders plans, meetings, your
own MOVIES, we like your Hollywood, it's fascinating. We don't
have MOVIES here, it is an industry that had many debates by our
Elders and so far further our world by how it sanctioned the
making of MOVIES, there is no Television or Newspaper either. Our
Internet is so Advanced, each child learn how to use it at
the age of Four. So all the knowledge and education, answers to
many puzzles, solving problems are sought via our Internet
Communication system; In one hundred years or so, earth people will
not be able to do without that system of communication which will erode
lessen your dependence on Television, Radio and Newspapers. We do not
believe this type of media's don't kill the Truth and paint a different picture the
reality.

How long do you live.

We have a little longer than you on earth, to about an average

of one Hundred years. As to do with our Advanced medical system and totally Fish and Vegetarian diet - we don't eat meat at all. Although we have the same animals as earth, almost the same but we use their product and ability rather than destroy them for meat consumption - Here again you can talk about the Food chain. It's all sound Fascinating, I am really looking forward to my week with you people"

"Let's get going we are almost one hour away from the city" we walked a couple Hundred yards, we were suddenly met by a large animal who only had a hat to protect him from the blazing sun. Archkhufu started a sign language which the strange looking animal seemed to understand.

A car ^{door} similar to a Chevrolet, was opened by our animal who politely bowed opened the door, then ~~door~~ bowed, closed behind us and went to proceed to the front seat and started to drive away.

"Can you please tell me, who is this Fair looking Fairy large animal?" Ott said Rabbi.

Ott, that's Dorang, he's my "gaffer" so to speak, he's my chauffeur my body guard, he looks after the cleaner of my car and my office, attend to my day to day needs at work. If it wasn't for the Fair, I would ~~and~~ the Fair, he will be similar to us on earth."

we we have derived them from earth. He is a cross between ~~an~~ ^{dogs} Cat and an Ape, Chimpanzee and orangutangs please explain to me, I am Fascinated.

we have become very Advanced in genetic engineering, so we use Hormones in various way to obtain an animal. It will be fine to his breed and to us.

Tell me more, Arch please, my Archkhufu.

(9)

You can call me Aichi, I don't mind, well it's like this.
Humans are more attracted to Furry, cuddly animals, especially children. The cats and dogs are easy to train Hygienically, I mean within a few weeks they can learn how to use the Toilets outside. Genetically speaking they are quite intelligent, so you on earth use them as domestic animals, to just keep you company. We when we analysed their role in your society we came up with the conclusion that is was Medicine.

As for the Apes, Chimp and Orangutan, they are similar to ^{Humans} man, in the way they walk, act and think. The main difference is they are not as adaptable to do what Humans do. In particular training or training them to go outside when it needs be, I mean the toilet, you can never really teach them. They are used to do the work on the Trees. They are also unable to talk like you, but they understand sign language, and because of their hands and legs being similar to a Human, they can become much useful to us and to themselves. So we crossed a dog with an orangutan and came up with a dog. These are the largest of our domesticated animals we use them as our Handy workers, just as my Honourable Friend in the Front of you can. Between the two breeds, they have become super intelligent and have a fantastic ^{small} sense of smell, they are trained to detect danger, I mean if anyone is going to attack me, they can smell me or my family are been threatened and act accordingly. They are sent to what you call a police school at an early age to learn, very similar to what you do with your police dogs on earth.

Where do they live, not with you, in the House.

Oh, no they live in our family, they share their own little beds when they reside with the Family.

What do you mean, I don't get it.

It is really simple, they have formed with our help their own so called Co-operatives - similar to your United Unions on earth. They only work seven hours a day, five days a week they get paid a wage, have two days off, holidays and a living like anyone else here. They even have medical and dental insurance.

Oh my god this is unbelievable, you are really advanced, so I found many fields where I saw what seemed to be an animal similar to our cows, but the body was much more slender I pointed out, what's this, is it a cow?

Yes you can see that, but we used as well as for milk, for transport and leisure. If you notice it's slender body, it's because this is a successful genetic mix of a horse and a cow - it called a Horean. We and our children have pleasure riding on it's back, but we will never killed it for it's meat.

I also noticed that one eye seemed to be brown like our Mon Cow and the other left blue. It's still Heditte Brownish almost blackish coats similar to ours on earth. # You seem not to waste any energy. Rabbits said you are right, we utilize all what our produce, we don't destroy it like you do on earth. Even for our Horean species, they have their rights too, exactly the same as our cows. So although we are of different species, we are much more intelligent than they are. We both recognize that we have to live together, co-exists, and that on another because we live in a peaceful environment. We managed to communicate between species, we don't call them animals, by all those their own words like cows, Horean, changed our pretty Pansport "I can now see how cruel we are to our animals on earth".

We can't believe watching you, especially in the Far-east regions where animals, such as cats and dogs are killed, slaughtered then cooked and eaten by human. The other day we watched an earth documentary and we were horrified to see before our own eyes, some ~~chemical~~ ^{of you} people actually helping themselves to a live monkey brains. They believe it carries some cure to their health. You can a spirit of anything alive when it is eaten carry any cure, we believe it will inflict upon you nothing but evil because you have made it suffer and killed it. Surely you humans if you were in the place of the monkey would you wish on the one who is eating you alive any cure or strength. If that is, mean I hope he would bloody choke or get a disease that would make him suffer and kill him slowly.

We were horrified to see in some places, I believe in the Far-east that they actually beat the dogs with a stick so many times while it is alive, so it can make its meat tender for eating when they kill it. How can that make any sense, kill such a helpless animal. That is why to avoid any such thought we are vegetarians and fish consumer, meat is totally banned, we use the dairy farm animals product, we do not use chemical fertilizer and we have managed to genetically cross the animals to breeds with us so they are of much use for themselves and ourselves, don't you think that is more reasonable and healthier. Anyhow if you refer to your medical analysis meat eat is not healthy explain why game stomach, chemicals.

It has almost been an hour and half and I suddenly realized that the car we were driven didn't make any noise, I looked back they was no smoke coming out of the exhaust.

Can you tell me Archie why is what do you run your car on we don't use oil, I mean diesel, gasoline like you do on car

Our Cars are run on Microchips, you buy an electric Computer and from the shops and use it as the energy source for your car some Card that are for one Hundred, Two Hundred Miles or so depend how far you are going and how much money you have. When you inject the microchip, it acts like a battery that has been charged up and you can start your engine. The difference is that the car has an engine, it has a computer system instead.

Suddenly, the car stopped, Doran opened the door for us, bowed we both exchanged smiles and Archie said "Well Doran I will see you after lunch, let say in two hours, we went through a large gate, it became noisier, my eyes felt like what was before me, Archie turned around and said today is our day off, its like the end of our week-end, like Sunday, so all the families are out worshipping their gods and having a carnival. We play football every Sunday in Ulfsson, sports and fun days for everyone concerned. Kids, children, adults by the thousands gathered in the open. At my feet, I couldn't even get my breath back at what was seeing. A child who approached me, and seemed to be very familiar with Archie, had the most amazing facial features. It was a girl with long blond hair about five years old or so. Her face was split in the middle, exactly in the middle of her nose, each side of the face was different, the eye on one side was oriental, almost like the Japanese/Chinese shape, outside her skin was almost pale yellow. The other side of her face she had dark blue, deep sea blue eyes and her skin was white like a Scandinavian. The features of her face, followed a European feature, her hair was long blonde. Still the rest of her body was

even more striking one arm was black the other white, his fingers had the Four Colours, black, brown, white, yellow but the ~~own~~ thumbs were white. The dominant colour of her body which was over one third was white. They were kind folks to our but the colour was neutral. The girl gave her name & kin and spoke in a strange language I could only comprehend about twenty percent of what she said.

"This is my daughter Marilyn, we wanted her to become an actress like your Marilyn Monroe, I know you can't understand our languages here, because it is made up of your main four languages on earth, English, African, Arabic, Chinese. I was unfortunate, I took a degree in English at our Foreign Language University, don't worry you eventually be able to pick up more than a quarter and I will be by your side to translate. When I was dumb struck ~~at~~ with what I was seeing before me, I heard a voice saying a word that sounded like 'look closely'. A boy, almost a teenage, approached us, he was on a bicycle with a few other boys. He was really cool looking.

one side of his face. He had black eyes, almond shape large in size, black skin, in the middle of his nose, is as a brush had painted the other half which was white with a greenish eye. The hair was jet black, the facial features were African. So ~~and~~ once again I looked then up & down to notice that over a third of his body colour was black. The fingers had four colours but the thumbs were black, again the brown white and yellow skin colour was split all over his body.

Let me introduce you to my son Mohamed Ali, he is going to be a great sportsman, he loves to run, ~~the more~~ I hope he will be representing our city in the coming olympic. He is a long a

distance, sumu. we are counting on him getting the fold
"Please tell me Arch, is Muhammed Ali not the name of our
Famous Boxer?"

Yes I named him after Henry He was a great man in the US
But we don't have boxing, we believe it's a stupid game
What is sportive about that watching two people beating the Heck of one
another, we believe in competitive sport but not Ouel. Nin
you Football, I mean soccer is very big here. We will be going
to a match this afternoon, it's almost the same rules as you
here it was all these people milling, laughing, smiling, enjoying
themselves. Some had one side a Chinese eye, the other a
black eye, ~~some~~ ^{others} had a Chinese eye, the other side a
Blue eye. What I noticed the ~~skin~~ ^{majority of the skin}
colour over one kind always followed the Hair colour, so if
you had black hair, the predominant skin colour would be black
and also your facial features will be African and so on. I was
rather amazed when I saw a few women with babies being
feeding, some of the breasts were black, yellow, white, brown
But noticed with great amazement this young lady about two
five years old breast feeding both her children, one child her
hair was black, it has been breast fed from a black boob. The
other baby hair was blonde she had been breast fed from the white breast.
All what I saw in these people it's beautiful, true colours, but each
had its identity and individuality with the predominant colour that
we were born with.

In a couple of minutes will be picked up by driver, my family will
be in, we are going to our place of worship. Then you will be at
the VIP stand for our Queen funeral.

Loved Football, I was really looking forward to the afternoon. As
a man of African I wondered what do they worship.

I must admit I enjoyed the Fame, everyone around was staring at me, coming shaking my hands, they wanted to touch. They seemed to be relaxed when I felt the same to them. As for their dress they seemed to have a summer outfit, I mean the color was quite amazing as the color was the same as the predominant color they have adapted. But some rebels were all kinds combinations of colors. I noticed they well looked upon by the society as rebels, like our Hippies, punk, rockers. I must admit, they had style in the design and then they wore the scarves, belts, earrings, make up, I thought to myself they must have had an Italian Gucci to design Team. We know to our destination Mrs Archibute was a very elegant. She also spoke little English and with the odd words here and there we managed to communicate.

Another ^{than} large gate we ^{walked} went through. My god it was like a massive large park, fields everywhere you looked and in the middle of each field stands alone was a building. These buildings were very similar to our Churches, Mosques, Synagogues, Temples. Each ~~one~~ one stood proud on its own in the large park.

Let Religion on you I ask Arch.
 I am a Jew like you, but my wife is a Muslim, my daughter is ~~the~~ Christian and my son is a Biddi.
 How come, I don't understand.
 All we have a different view of Religion here you religion is your own personal business and choice. All Religions are good and there are here to make us tolerant of one another not to hate each other. A person who worship his God, he only knows how much love it is on his.

Do How do you choose your own religion?

It is really simple, when you are born, if you are a boy you follow your father religion till the age of Ten. If you are a girl you follow your mother religion till the same age. At school you are taught the four religions, usually in times the only differences you are allowed to go to the synagogue or the church with your parents till the age of Ten. Then you are given a choice at the age of Ten, which religion you would like to choose. No pressure whatsoever is put on you to follow up your parents religion. You make the choice and we will let it be the rest of your life.

You are not allowed at any time to discuss religion, either at any place outside the school religion teaching class. It is not only forbidden, it is considered a crime to talk about religion anywhere beside the school or the cho place of worship walls you are automatically isolated if you are young. As the system, in a solitary confinement. And if you are over 18 you are set to prison to like our colony, we don't have any race prejudice, we also don't have any religious prejudice. In a family we can have two, three or four religions practiced. By the way before, ask me you are not allowed to have all members of one family to practice only one religion. Two is the maximum. On the day when almost two hours in four different places of worship and I noticed with amazement, that everyone just got down to pray, he left a prayer mat and met up with other members of his family outside, in the kindergarten areas that they arranged to meet. I started to see the common sense behind the people. Ten's recognition of us if they had picked up all our mistakes and found a remedy really and go on and live peacefully live longer and be happier. By now, it was almost two o'clock in the afternoon. The

Archuk Hufa children became my companion. They enjoyed the attention I got from ~~just~~ all the people, we held hands. At the time for lunch, we went to a restaurant, that was another amazing encounter. Here ~~the~~ the incognito people worked along the animals. They were a couple of young orangs which I had told one of them was Mrs Dorang Senior Sen. Also two chimp these were much smaller in size, their face were like our non-fedegree cats, the body had cats fur, but they moved and disposed themselves like a chimpanzee, so they were able clean the table, worked like "Boss Boys". While the orangs were in charge of setting the tables. The Tena incognito people were all the one taking the orders and serving the food. With sign language to the animals, they were easily able to communicate and get them orders which table to clean and which table to set up. We were set down by the Head waiter, and the one of the orangs brought us the menu, politely smiled and bowed. I was extremely impressed, I wondered how much they would get paid per hours and how well they could do on earth in one of our Macdonalds restaurants. As for the Archi order, we all had some delicious salad with cucumbers and the entree was a full trout served with what seemed to be a mermaid sauce with lemon juice. Watched carefully how the orangs and chimps were communicating and how well they seemed to do the jobs. They didn't have names, the Head members on their shirt and the sign language will first show the number on the finger so each one will recognize what's required of them or her. What was more interesting is how well they were treated by the people. When my train arrived I actually ordered some French fries. Here was ~~the~~ it Chimp cat on training assisting one of the Tena incognito bar in serving the food. He held a silver platter with the French

He looked extremely nervous, you couldn't but feel sorry for this lovely looking creature. When he started to serve me with trench fries, He could only pick one fries at a time with the service cutlery. I patiently smiled and said talk your time, as I am enjoying this lunch very much. After he served the first fries the waiter came to his help and showed him how to hold more than one fry with the service cutlery. Anyhow I was quite hungry and almost cleaned all my plate. Then it was time to go to the match. Of course myself and Aschi with Mohamed were really looking forward to the occasion, but the ladies had other plans. Football was met then Cup of Tea, we took the sky TRAIN, Ten minutes later it dropped us outside another large iron gate, we went through them, that wasn't just a stadium, it was a whole city. My eyes were wide open, not able to take all well my friend RABBITWEIS man, we do things a little bit different here. We as the Council realize not everyone in our country loves Football. We know that the big money is earned by these kinds of competitive sports. So we make a compulsory rule, in the city, the Business investors decide to Build a Stadium. They say that the cost will be one hundred million dollars. They had to fork out twice as much between themselves to provide other entertainments for the rest of our people. That is what you see before you here today. We had a small cart, similar to our old carts and went on a tour.

Here is our stadium, a Ten minutes further, we came to a large Baroque complex, when we entered the Court yard, they were over two hundred studios like decorated bars, shops with chairs on the pavement, Coffee Bar, Tea Bar, Cabs etc, but most of all Musicians and artists drawing everywhere. Children sitting in various conversation with the artist. Everyone

played music in his little studio, classical, jazz, blues. Children watched, some were handed over the instruments and started to play. In one of the studios a young boy and girl was playing a Beethoven piece. Another girl played a Vivaldi on the violin. It was a musical carnival atmosphere, everyone took music extremely seriously and enjoyed very much. In another street of all the buildings were of the classical gothic type, these House painters, artists. They were many Van Gogh, Murnau & Cezanne etc. ... yet hundreds of artists paint in oil, water colours or using a chisel to sculpture, a statue & Michelangelo piece. Children adults were gathered around all the artists, in deep discussions, some were invited to start a painting, or chisel a small figurine. Old men & women were in a more serious mood dressed a period artist. It was just a wonderful world. In a couple of other streets we saw the artist action studios, these were mostly Craftsmen and women blowing glass, making a chain, sheppings. The atmosphere was one of a carnival, safe children, parents went everywhere, they all seemed to have a walky talky they kept them in touch with each other. After we left the public house & laughter, they arranged to meet up with the grand parents and we went off to see our match.

To our Arch dismay the team he booked down one all with the other one. But there was no penalty shoot out rule. If you still draw after extra time then the match is drawn. We replayed a week later, till one side wins. They believed the penalty shoot out decision was just like gambling and didn't see any sense in the match to be stopped, it was just bad luck and that was not acceptable to them. I started to study the movies, as Arch gave me some. I later on took his son & daughter in.

an ice cream, when I noticed on the Bill in large, Discount: 50%. I asked Archie why discount of half well it is our rule, on everyone Sunday in the month we have a large match and as you can see on Carnival day, so it is a by-law that all food, drinks and any other purchases are half price. Believe they is such a High Volume of people who go out on that day that the Merchants make so much money even with the discount. The Association of Restaurants and Shop Keepers would like to have the Carnival a day, and the Council is considering it.

I could help but notice these large ante faced animals who have some trucks that collected the rubbish bins. They were accompanied by the Tena people. They were quite muscular, the fur was of a Chinese Panda with a rather long brown eyes similar to the one of our goulles, they also the body, hands, feet of a goulle and moved like a goulle. The fur was white mainly with black patches, especially around the eyes. I actually went up to one of them, who carefully examined me, as I looked different to their plant inhabitants and I shook his hands, He made sure he removed his working glove. He felt like a panda but moved like a goulle.

I was getting a little tired from being so overwhelmed by these people "you will be staying in our guest quarters." said Archie. When we got to his house, I was down to my bedroom, said good night and went straight to bed.

I didn't wake up all moon the following day. Archie was out in the garden playing chess with his wife. Got Hello Robbi, I hope you slept well. & "oh I am well rested."

"Have some lunch then we will be on our way." As such After I had Four Cups of Tea and an omelette, we set on our way. Once again Dorang I was our Chauffeur. We are going to visit some of our school and University when we get there. We started with the Kindergarten. I was quite surprised to see that these young children are taught from the age of five years a craft. How to cut wood and make various things, some are taught how to identify electric plugs, other are been shown a computer engine of a car and what to look for. The seven years, were all taught as well as a craft, a music instrument, anyone had better to read music, play an instrument or paint a painting. The other areas of craftsmanship and arts were compulsory beside everything else they were to learn. Archie explained "It is of vital importance in our society that our children first learn to be artist and a craft, how to make things that will give them a strong base of substance that will help them later on in their lives and judgments.

do you pay for education, I mean to you have Council schools that are free and private that parents pay for. We believe that education should be totally free for anyone. So when a child is born he or she are allocated some education beyond, that they parents have the freedom and choice to place in any school they feel appropriate for them. Therefore the schools who are not up to standard and don't produce good results are kept by closing down because parents would place their children there. So you have to be completely made to survive. What about Universities, is that free or you have to pay more money from the state and pay later on.

No, it's actual similar to the Soviet system, no fees to go to University or have to extend your studies to post-graduate.

We actually encourage our children to go beyond a University degree and achieve what is similar to your "PhD". We give them a wage so they could live on during the whole period they are studying at our Faculties. To our belief it's not fair that bright students being held back from higher education because their place have been taken by a rich student whose parents have plenty of money. Like in some of your Universities in North America, Canada, some rich ~~children~~ student families who are not even born in that Country are taking the place of the local student who cannot afford the tuition fees and to support themselves. That's not fair on your own people is it. When he finished our tour, Archi said would you like to visit our Hospitals and general practitioners surgeries. I nodded.

His was another area, when Archi explained that Medicine of the highest quality is provided free for every citizen. Once again they are allocated Coupons that they purchase yearly via their income. The prices are fixed by the state and everyone is able to afford them. If you are out of a job, or a pensioner, they are given to you. It's your choice which Doctor or Hospital you choose to be treated in.

I asked on our round to a Laboratory, Have you managed to find a cure for Cancer.

"We don't exactly have the same type of diseases as you do on earth, as we ban smoking or the manufacturing of cigarettes. We also don't eat meat which we believe is the cause of a large proportion of Cancer. Therefore we are able to eradicate the disease and treat in much more efficient way that earth people. Also we don't have any pollution. We use the sun as our main source of energy. We have no chemicals or additives in our foods. That's why we have managed

to live almost a third longer than young people.
What about "Aids" Have you Heard of that disease?
We have watched you very carefully, so FAR we have
managed to prevent Aids spreading amongst our Terran
Folk.
Have you Found A Vaccine?

No, we believe that being Homosexual or a Lesbian
occurs because of a Hormone imbalance. So as a result
of extensive research. As soon as you are born, we do a
Hormone test on each baby and if they are short of what
we can make Hormone for the boys, we correct of such an
imbalance with a series of injections till it is balanced. the
same for the Baby girls happens too. So we really don't
have any gay men or women on our planet. Let me tell
you there have been a very delicate debate as some of our Med.
expert wanted us to let nature decide but our elders
overruled them.

Would it be too much to ask if I can ask you to supply us
with the information for our people.

No, we can give it to you, but I am sure they will be
an ethical question by the gay community charging you that
you are trying to eradicate them, be careful!

But from my own analysis of the Homosexual subject, I believe
many of them turn gay because they are socially traumatized
when they are young.

Yes, you are right but we do manage to put a stop to
that. You pay the highest penalty of death if you are
found guilty of molesting children, it is just not tolerated.

Here. ~~What about~~
What about physical beating. We spend the rest of the day visiting
school, Universities, Hospital, doctors surgery. I must admit they

at least Half a Century more Advanced than us on Earth.
 In the evening, we had their grand parents for dinner, we
 played cards, I was shown to Marilyn room and noticed
 that all her room was decorated mainly in white color that color
 her predominant color Body colour. The same for Mohamed Ali,
 his room was black. we played Card similar game to our
 poker, they taught me, what I found mostly amusing it was
 difficult to read their faces, if they were bluffing, the eyes
 of each eye confused you. The grand father made me laugh
 a lot, He was really crossed eyed and when He looked toward
 me, I didn't know if he was looking at me or his son.
 That particular evening Marilyn was very excited she have just
 got an orphan Chimp cat that she have adopted. It
 was really cute, a cat face which was white and tortoiseshell
 mixture of colours, greenish hazelish eyes, had lots fur all over
 so it felt lot really cuddly. Nishi brought through the Toilet
 training litter box. For the first ten weeks the two weeks
 old Chimp cats will be sleep with Marilyn. Chimp cats were
 very domesticated because they were naturally clean animals,
 and learned to use their litter box very quickly. The Body sleep
 was of a Chimpanzee, with hands and feet. A specially prepared
 basket was placed at the end of Marilyn bed, where and another
 pillow of Marilyn was placed on the inside so the Chimp cats can
 smell its owner and it was believed that gave it comfort.

It's now the third day, I was up still late at eleven o'clock,
 I suppose I won't use to the Fresh air and oxygen that came
 to knock me out. After my usual tea.
 Today we will be visiting some of our punishment parks, which
 you call Boot Camps.

We Heeded on Hours out, we came to be in the middle of no where, stopped outside a gate. Dray! showed the place after a Card, He waved us in. putting

Inside we saw army men, ^{putting} through some young kids no more than ten, to Twelve years old ^{some} a very difficult training and strenuous exercise. And one a two kids who fell behind were kept and rep ordered to repeat the exercise.

These are badly behaved children, that have given their child or parent some behavior problem. They are brought to the camp. Usually arrive by a given twenty baskets and made to work ^{play} at least ten hours a day in the quarry. They are only let out when the camp officer feels that they have learnt by lessons and are able to behave themselves. This is actually an easy camp, we will see the next one.

We went through another gate, this time I couldn't believe what I saw before my eyes. Adult men that looked extremely rough, were being tied up and very badly beaten by the army officers. I asked that is really cruel why do you do that to your own people.

It's very simple, these are men who have beaten their wives or their children, as the only way to punish them is to buy them the first time you beat your wife, we will buy her two weeks and beat you twice as hard each day. Once you are let out, if you repeat the beating again, we will buy you for two weeks, beat you by days but make sure to break your fingers. The third time, if you repeat beating your wife, believe me your arms won't have any ability to do any more beating. It is very effective ^{near} ninety percent never repeat the beating after the second time unless we have broken some of their fingers. Don't forget men who beat help less

Wives and Children are towards themselves and they will only understand and respect force.

On the way out he took a 10th turn, and visited another camp, which seemed to have down and out people, who pushed their own carts.

Well these are helples, failures who decide for their own sements and reasons to drop out of taking an active part in society. They become beggars, or what you call Tramps. They are really helples, we found out, though a psychanalysis study we commissioned, that they will not change and become an active member for society. But the Commis recommended that they are interesting people and can be put to use in our society for their own good. So we provide them with accommodation at the park and classes, where they can become a story teller, a talker and readers, play a musical instrument, etc we make sure they are clean then send them out so instead of begging they can earn a living entertain people and still feel free.

Some are men dressed as clowns, some adopt a monkey or a donkey, chimp acts, teach them tricks and they both earn a decent living together. It was interesting if you became an alcoholic you are not let out of the compound until you dry out. There is a strict by law against beggars, the Terra people believe that each individual in their society has to earn a living no matter what. If they were unable to adjust and dry out, still wanting to be a burden on society then the harsh punishment will follow, they are taken to guerries in the wild and made to work, an extremely physical task which sooner rather than later brings them around. In the evening we were invited to the ~~second~~ Terra animals wedding, silver anniversary.

Tense animal? Find a good name
for them

(27)

It was during who worked for Archie Silver wedding celebration. Many of them Friends and children were present, also objects and Panfolla were also invited. I noticed the stay presence of Tramps who entertained the children with various tricks. Some with their animals companions played a musical instrument. The Tense people mixed extremely well with their hosts, sign language and laughter was everywhere.

It is now my fifth day, each evening I took many notes of what I saw during the course of my exploratory trips. I am back in two days, so far I have learned a lot from these advanced and well disciplined people. However wondered how come a particular city I don't seem to notice real poverty. It is still apparent that they have people in luxury cars, clothes, expensive houses and some ^{have} ~~own~~ average or below style of lives. Archie was in a rather good mood, today he was chairing the Council meeting and I was to be introduced to the city elders and ask any questions I wanted.

It was an extremely friendly atmosphere prior to the meeting. On the Council Chamber started its session. The Tense people talked through their application, for planning welfare, housing, recreation and they were dealt with in a most efficient way. I got 2 days to learn that all Council services are privatized, competition created efficiency and speed in the Tense system. Very few officers were employed by the Council. Only the technical expert would be a part of the Councilors team to advise with the proposal and to meet with their requirement. A planning application maximum grant was no longer than three months no matter how complex the application was. It was up to the applicant and the Council officer to handle the Tense period. To all various queries on

All various queries in the procedure went out to private Consultant firm with a strict Time uply limits. This applied in all aspects of applications and proffering regard by the Tena people, and anyone seems to accept the 3 month limit rule. The right of such Time Constraints were requested of our planning, welfare and Council officers they will be upon and in indefinite struggle actions.

In the afternoon, I was taken to a Court, and once again any civil or Criminal case not matter the date or the complexity has to be dealt with in three months MAXIMUM. They seemed to open the legal system but not relying totally on lawyers, they created a middle team of legal secretaries who dealt with the day to day complaints and took a large load of work who would normally be handled by lawyers, with a very long complex presentation and "cut the" accompanied by a large bill too. The rules were very clear, not fancy like we have back home, the punishment to be clearly spelled out too. They didn't rely on judges to make the legal decision, they had what they called arbitrators committee of three, some specialized in Commercial, some in Criminal and they made most of the decisions. You had to follow the rules of the law and because of the Time Constraints you wouldn't be able to spend a week trying to find a fancy reasoning in order to get your guilty client off. It was also made clear that it will become a Criminal offense by your legal representative, if knowingly that you are guilty tries to present your case as you were innocent. If you were guilty of a crime, the legal representative will admit to the guilt on your behalf and spend the rest of the case trying to get your case sentence. A phrase was used in the Courts by the prosecution guide officer "don't give us that earth talk." I found out that it meant that that the earth lawyer are a

in the afternoon I was a guest of the Government Facilitators, that is what they called Bureaucrats. In the Tena people political and government Administrative department, they were run by very few people whose jobs was to make sure information was provided to the private sector. I was amazed to see that almost ninety percent of the government ministries, and offices were being run by private companies who were given contracts that were spread evenly so each co-operation were equally treated. The TAX department was not run by the government or provincial TAX collectors. The TAX was collected by a chosen chartered surveyor firm that reported to a board full of Bureaucrats. So all these thousands and thousands of government civil servants no longer exists. The private sector is known to be more efficient than the government public and therefore the system of collection was quicker and cheaper. However TAX charges were made simpler. In the Tena TAX system, you paid one TAX on any items you buy, it is a ~~2~~ Twenty Five percent one time, that is collected automatically the same week as you pay it. No Higher rate taxes, no provincial TAX, no liquor TAX, no GST, no VAT etc. Although you might wonder it's not a fair system, I must tell you I found it extremely efficient. So if you are very rich and make billions of dollars you only pay a Twenty Five percent TAX. But once you pass away, for the super rich there was a one TAX system limit. The first hundred million dollars no one pay inheritance TAX, anything after that is automatically transferred to the state Business Banking funds. My belief of a rich man who is alive he should enjoy their fortune but once they are dead, the rest of kin & children should only inherit the first one hundred million dollars. then it is a force

start and up to them to increase their inherited Fortunes. The Monies are put in a saving accounts that is designed to help start any new kind of Ventures.

So if you are to start a new business and need government help, you do not take it to government officials. For apponnet the ten people found that civil servant are useless in making any decisions because they have really never taken a risk in their lives. So they have done away with all these government departments that are suppose to help Business. So what you do, simple, you go as you would usually to your bank manager, present them with your feasibility study. The Bank will study your proposal as in normal, or they approve it. The first seven years are interest free. Who pay for the interest, the government. It is so simple, it leaves you as an individual to take the risk of opening a business. You profit or loss account the first seven years are healthier than if it would effect the Bank decision in advance the loan. Because it is the Banker who knows and can analyse as much as possible whether or not your Business proposition is reasonable. Not the Civil servant who know nothing of Business experience and who only keep their jobs through delays and by passing the buck to someone else.

In the evening, we all sat at the table. Tomorrow is really my last full day before my departure. Book To earth asked my host Archie "How come are you the City Mayor and you seem to have a very good standard of, almost a luxurious life?" "It is simple, we learned a lot from your earth mistakes. Any elected politician is paid the same as a company - or co-operative executive is paid. All his Councillors or Ministers

carries the same as the Co-operation director would earn. So I get over what is equivalent to one million dollars per year. But our Bonus could be extremely large depending on our performance with the economy. So the better the economy, the employment figure, the crime rate are, the higher your Bonus. I earned this year over one million and Half in Bonus. So that way Corruption is not necessary, of course by on the very fresh one. But once you are caught taking Bribes, it is the death sentence, no messing.

How do you get elected? I said Rybb
By the people, you are not allowed to accept any donations from individuals, Co-operation, unions, organization. It is a crime & also punishable by death to both recipient and donor to accept donation. We consider that a Bribe, because whoever have given you money, he naturally won't something back later on, once you are in power. A budget is set where each politicians and party are allocated a reasonable amount of money to present the case. And if you are a wealthy politician you cannot use any of your money to get elected, it is illegal and carries the death sentence.

^{NOVA}
Tomorrow we will be taking the supersonic ride, 3 thousand miles away, to Terra Nova where the World Council gather. It is like your United Nation. You will witness a very interesting international & TRIAL system.

We caught a plane on the morning, an hour later we arrived at a modern city called Terra Nova ^{NOVA}. On the way I asked Mike what was the population of the Terra Nova people, he surprised me, Three Billion people that was a lot. I then asked them how many hours have you had monthly. He said that he would

Stalla answer my question on the way back from our Trip. We entered a very large assembly room that reminded me of the United Nations. People very smartly and formally dressed, each one followed the Country National dress fashion & Realistic. Some had suits, some long one piece jalla bya like the middle-east people, some had very little on, I presumed they lived in hot Countries, it was a colorful exhibition of different Nations (Archie Translated in English, what I noticed they were not heard yet because by all spoke one language. A panel of men and women, about 36 of them, dressed like our judges came in 'we all stood up and the TRIAL started. It was held by the fact that the Court members represented the whole of the Terra indivisus Nations. Such a Court has ultimate power and decisions. Their power was backed by an extremely strong army, highly trained men and women that represented their whole people. This Army became the strongest and kept the peace for over one hundred years. Each Nation was allowed to have their own army, for security reasons, but the Terra Nova Court managed to solve all dispute by enforcing the laws and if the Nations wouldn't accept their decisions they had the power to ^{with their army} physical go in and make sure the decision was done. The First Two accused were called in. Final Summary

What is your names - the Head judges ask. ^{to the trial that had almost two months}
 My name is Hitler Berlin
 My name is Stalin Leningrad.

The prosecutors stood up. We are charging the accused by waging war on their neighbors, for the purpose of increasing their hold on the area. As a result, we had almost 10 million people dead and it took our army one year to beat them. The prosecutor went on to list all the atrocities these men have caused. Their defense explained that while they were guilty of aggression.

their main aim was to provide enough space, land and raw material for their own countrymen and requested a lesser sentence. The prosecution called the first accused man "Mr. Hilla-Berlain, please tell the Court why did you wage war on an innocent country like "Poland & CZECHOSLOVAKIA". " We need extra space, and raw material and men to stop these Communist, socialist ideas spreading from the eastern borders. We believe in being right to the right wing of politics, where they are totally left, so only strength can put an end to the Communist plague."

The next accused was asked the same question: Why did you Mr. Stalin Lenin wage war on Lithuania? His simple answer was we were afraid of the right wing element of Mr. Hilla-Berlain, so we simply needed to expand in order to strengthen our army. It was for our survival.

After almost four hours and a lunch break the prosecuting put his closing argument on behalf of the Tena NOVAYK Vlada "It is simple, they are both aggressors, Ten million innocent people have died before our army succeed in defeating them. They only care for their own power, not the people, they use their simple minded people as a tool to achieve their ambition. As for the argument, that one wanted to be a right policy whereas and the other a left policy schemes. It is all a lot of fancy talk and lies. They are both exactly the same, because you keep on turning right, you will eventually come out on the left and vice versa. I demand the execution by firing squad for the leaders, their cabinet and army high generals. When they took a break for half an hour. The panel verdict was unanimous, death by execution for both, then they read the names of all the ministers and generals of both sides.

Their main aim was to provide enough space, land and raw material for their own countrymen and requested a harsh sentence. The prosecution called the first accused man "Mr. Hilla-Berlein, please tell the Court why did you wage war on an innocent country like "POLAND-SLOVAKIA". " We need extra space, land, raw material and men to stop these Communist, socialist ideas spreading from the eastern borders. We believe in being ~~right~~ to the right wing of politics, where they are totally left, so only strength can put an end to the Communist plague."

The next accused was asked the same question. Why did you Mr. Stallen-Lenien wage war on Lithuania? It's simple, we were afraid of the right wing element of Mr. Hilla-Berlein, so we simply needed to expand in order to strengthen our army. It was for our survival.

After almost four hours and a lunch break the prosecuting put his closing argument on behalf of the Tena New York Wald. "It's simple, they are both aggressors, Ten million innocent people have died before our army succeed in defeating them. They only care for their own power, not the people, they use their simple minded people as a tool to achieve their ambition. As for the argument that one wanted to be a right policy believer and the other a left policy believer. It is all a lot of fancy talk and lies. They are both exactly the same, because you keep on turning right, you will eventually come out on the left and vice versa. Demand the execution by firing squad for the leaders, their cabinet and army high generals. when they took a break for half an hour. The panel verdict was unanimous, death by execution for both, then they read the names of all the ministers and generals who backed them.

The following two cases where, the Tena African and the
 pol 731 pot regimes over two dozen men paraded
 the Court, to receive their sentences.
 The judge started to read out "you are the rulers of this country
 your autocratic and ruthless regime have brought misery upon
 your own people. your imprisoned, punished, murdered anyone
 in your nation who spoke his mind. You killed millions of your
 own people. Some of you decided that education and arts are
 not necessary so you massacred all these people. Other felt
 that if this nation were made up of various tribes, the only way to
 stay in power, to exterminate all the unfriendly Tribes using
 your armies to murder your own innocent men, women and
 children. We the Court can have no mercy on you you are
 all sentenced to death by hanging.
 We all are grateful and proud over the Tena NOVIA youth army that
 have so far managed by force to end a war with these nations
 people and capture their leaders to have death throes here.

The last case was quite different, they were two nations,
 neighboring that are about to wage war on each other. The first
 leader was called Matarawel, the opposite was called
 Hamarab. - The judge once again was reading the Court
 decision.

1 you are neighbors, you go back thousand of years as Cousins
 It disgusts to see that you are always at each other throat
 and who suffer are your own innocent people. Our verdict is
 unanimous. We are going to take both of you, your Ministers
 your generals to a County estate for one week. You are
 to enter into peaceful negotiation, if that fails, we will
 surround you the last week with loaded rifles. And

Whoever come out alive will be the victor. It is vital that
one side come out intact. If one of the victor side is dead
then we will replace the opposite side with a new leadership &
start the procedure all over again.
