Emil Malak Wrote!

International politics by Emil Malak

Emil Malak

Introduction

Over the years, I have written many op-eds on various subjects including my recent articles on coronavirus, COVID vaccines scams, unfair patent laws, and even climate change scams. Sometime ago, I dedicated years of my life to studying history from all periods, but with a particular focus on the World War II era ahead of writing my World War II novel, [Sadness with Joy](#). I am planning to write my next article on the looming evil World Economic Forum (WEF) that many believe will soon take control of our lives through a global digital currency system that will bring an end to the mighty dollars and physical currency. The vaccine passports were just a trial run to test the feasibility of going digital and

cashless to take greater control of the world masses and be able to monitor our every move. There is Charles Klaus Schwab the founder of a group of elite Billionaires and closet dictator politicians that want to achieve world economic domination through globalization by the implementation of a uniform digital currency control for the world.

Clearly, both mainstream media and social media outlets promote their own biases and do not report the truth. Independent investigators are needed to verify Russian war crimes being committed, and the United Nations should take swift action to expel Russia altogether.

Finally, climate change is another scam being perpetuated on us. CO2 and greenhouse gases make up less than one percent of atmospheric gases, yet the public is being led to believe we are in a dire crisis. Read my op-ed on the subject where I do an in depth breakdown on the climate change scam.

Below are links to some previous articles on the coronavirus confirming that many epidemiologists, cardiologists, pulmonologists, and health authorities got it all wrong. We will continue to pay for the massive COVID-19 vaccine scams for years to come. The number of vaccine injuries is climbing and will continue to do so for a long time to come. Even Dr. Fauci is now conceding that the government will no longer be involved in mandating vaccine passports.

Article on the current Russian/Ukrainian Conflict

<https://www.ceocfointerviews.com/emilmalakinternationalpoliticsoped2022.html>.

The truth must be told - I take no prisoners!
Is long Covid becoming a problem for the vaccinated? (See Topic Four)

Western Democracy is being hijacked by fear, coronavirus, climate change lies, H5N1, and Monkeypox

Never let a crisis go to waste! The pharmaceutical want to vaccinate us to death!

The Silicon Valley, social media lies, and misinformation has made the difference between a conspiracy theory and an actual conspiracy six months

Vaccine manufacturers are preparing the public for their next big vaccine campaign, this time against Smallpox and Monkeypox. JYNNEOS is produced by vaccine maker Bavarian Nordic and received FDA approval in 2019. It is the first live, non-replicating vaccine approved for the prevention of smallpox and monkeypox disease in adults 18 years of age and older determined to be at high risk for smallpox or monkeypox infection.

Just one day ago it was reported that there are more than **100 million** doses of an older smallpox **vaccine**, ACAM2000, which CDC officials said **has** some significant side effects. It almost seems as if they had prior knowledge that another disaster that would need a vaccine was looming. Of course, another big vaccine campaign means many more profits.

What the scientists seem to be ignoring is the fact that Monkeypox is a disease that has mostly been confined to gay men, but yet somehow this current outbreak has ventured into the heterosexual population. Could it be possible that heterosexual men and women

that received the coronavirus vaccine may have had their immune systems compromised making them susceptible to this new form of Monkeypox? After all, the coronavirus vaccine has increased the likelihood of a vaccinated person contracting shingles; it is not an unreasonable assumption to think it could also increase the likelihood for Monkeypox. As has often been the case, once again we need credible members of the scientific community to confirm or deny this theory.

<https://www.reuters.com/business/healthcare-pharmaceuticals/us-health-officials-releasing-some-jynneos-vaccine-doses-monkeypox-cdc-2022-05-23/>

Bavarian Nordic announced recently that the U.S. Biomedical Advanced Research and Development Authority (BARDA), part of the Office of the Assistant Secretary for Preparedness and Response at the U.S. Department of Health and Human Services, has exercised the first options under a contract to supply a freeze-dried version of JYNNEOS® smallpox vaccine, thus allowing for the first doses of this version to be manufactured and invoiced in 2023 and 2024.

Currently, there is no proven, safe treatment for Monkeypox and while anyone can get it, the CDC is warning that the gay community appears to be the most vulnerable. Dr. John Brooks, a medical epidemiologist with the U.S. Centers for Disease Control and Prevention's Division of HIV/AIDS Prevention, said recently that the virus is "circulating globally in some parts of the gay community."

How do you manage a tragic human crisis and turn it into a moneymaker?

First, was the creation of a phony climate change crisis, then came the coronavirus. Now we have Monkeypox, and we are being teased with the possibility of an H5N1 outbreak. We are currently experiencing hyperinflation, supply chain disruptions, and ongoing social upheaval. The West is heading fast towards a breakdown of basic law and order.

Oxfam Canada, an organization whose mission statement says they are trying "to build lasting solutions to poverty and injustice," just published a staggering statistic showing that during the coronavirus pandemic a new billionaire was created every 30 hours, and now, one million people could potentially fall into extreme poverty at that same rate.

<https://www.oxfam.ca/news/pandemic-creates-new-billionaire-every-30-hours-now-a-million-people-could-fall-into-extreme-poverty-at-same-rate-in-2022/>

<https://www.scmp.com/news/world/article/3178987/coronavirus-new-billionaire-every-30-hours-during-bonanza-pandemic>

<https://www.drugs.com/news/gay-community-most-vulnerable-monkeypox-threat-vaccines-available-soon-cdc-105565.html>

The World Today Has Become More Evil Than Kind

Introduction:

WARNING!

Is the current supply chain disruption a planned economic weapon by the Chinese to weaken the West?

China must be stopped; all their foreign assets in the U.S., Canada, Australia, New Zealand, and Europe should be nationalized

Starvation, shortages of basic foods, and price hikes will lead to supersessive regime change and complete disorder

Today we are watching uprisings take place in several countries, starting with the resignation of Sri Lanka's prime minister, and looting of supermarkets in Iran. The starvation revolution has begun.

Poor countries that lack necessary farming essentials like fuel and access to sufficient water are in for citizen uprisings fighting for government upheaval, particularly in oppressive regimes. Starving people will not stay calm for long. They will rise up and unite to topple their governments. If the government is not creating an environment where someone can feed their family, the people have no other choice but to revolt. Every government must ensure that basic food and energy is available and affordable to everyone.

China no longer needs Europe; the silk road and Africa will replace the West and give China political and economic control.

Thousands of European companies will face bankruptcy before the end of 2022. No oil, no gas, shortages of food, prices hikes, and the worst may be yet to come. China's intentional supply disruption will be the final nail in the coffin of Europe's already ailing industrial and manufacturing sector.

Shortages and price hikes will have the greatest impact on the middle and lower classes. What will they do in response? They will come out in droves and demonstrate, showing their disapproval which may lead to a social upheaval throughout Europe. Production of goods will decrease drastically, if not stop altogether. Companies will go bankrupt, and millions of jobs will be lost. Europe will disintegrate financially as they will not be able to compete with China who will greatly increase prices following months of delay in delivering products. They will be in survival mode and wealth creation will cease to take place.

Greed driven capitalists and irresponsible politicians in the West have failed their people by shipping all their manufacturing intellectual properties to China to get cheaper products. As a result, they will have put themselves in the predicament of having fewer jobs and products so expensive they can no longer afford to purchase them.

Hopefully, they would wake up and start an internal manufacturing revival. Implementing a "Manufacturing Marshal plan" is a must. Europe needs to wake up and among other things, they must stop the so-called "green movement," and recognize it for the scam that it really is. Under their manmade green banner, they are needlessly destroying their economies and their environment at the same time.

Every Muslim, Christian and decent human being should stop buying Chinese products

Chinese President Xinjiang and Russian President Putin are wicked leaders who are as paranoid as Hitler was

Cut all economic ties with the new Evil Empire China

Paranoia is a self-created condition by evil powerful leaders. It is based on them believing their own lies they create in order to protect their idealism. They make up allegations that they know are not true and then promote them as being existential threats to their nation's existence, and then they act accordingly.

Today, mass internment camps, rebranded by China as "vocational training camps" are being used by Chinese leaders to destroy an entire whole and religion. I once again call on all the Muslim and Christian countries to boycott all buying from the evil Chinese regime. My heart goes out to all of these great Uyghur Muslim people who are being wrongfully punished.

A newly published cache of documents directly links top Chinese leaders including President Xi Jinping to the state's crackdown on Uyghur Muslims. The documents include speeches which analysts say prove senior government leaders called for measures that led to mass internment and forced labour

<https://www.nytimes.com/interactive/2019/11/16/world/asia/china-xinjiang-documents.html>

<https://www.wionews.com/world/xinjiang-papers-leak-reveals-connection-between-xi-jinpings-speeches-and-the-uyghur-crackdown-432970>

Dr Adrian Zenz – a researcher at the US-based Victims of Communism Memorial Foundation received files from someone who claimed to have hacked Chinese Police servers. Zenz gave the files to the BBC and the pictures were verified by several image forensic experts. The information given to Zenz showed images of suffering by Uyghur victims being held against their will in Chinese concentration camps. I am grateful for the courage shown by Dr.Zenz and the person who provided him with those files. These heroes are risking their lives and safety to expose the atrocities against basic human rights being committed by the Chinese government.

<https://www.icij.org/investigations/china-cables/xinjiang-police-files-uyghur-mugshots-detention/>

<https://www.msn.com/en-gb/news/world/haunting-portrait-of-crying-uyghur-muslim-at-chinese-re-education-e2-80-99-camp/ar-AAXFdmz>

Below is an excerpt from an article I wrote in August 2020:

Cut all economic ties with the new evil empire, China

Europe, the United States, and the Muslim and Christian world should come together and act now. As an Egyptian born Christian, I appeal to Muslims; stop buying Chinese made products. China currently has more than one million Uighur Muslims illegally incarcerated in so-called “education camps.” Additionally, they are forcing the sterilization of Muslim women to eliminate future Islamic generations and end the existence of Muslims in China. My criticism of the Chinese government is aimed exclusively at the regime, not the People. In no way is this a reflection on my feelings towards the Chinese people. Chinese immigrants are hardworking, family oriented, industrious people that contribute greatly to society. I have many Chinese friends, and I have great respect and admiration for them. you rarely find a Chinese immigrant dependent on government assistance.

History repeats itself

Has the world forgotten the lessons learned from World War II? In his ambition to conquer the world Hitler imprisoned Jews in concentration camps and invaded countries. China has similar ambitions; they are intent on conquering the world economically. China has been buying up western assets and investing heavily in Africa. Additionally, they are flexing their military muscles in front of the world with their actions in the South China Sea.

China is overdue for a military confrontation. Soon, they will be on the brink of war in either the South China Sea or in Iran’s Strait of Hormuz. Iranian mullahs (Muslim clerics learned in Islamic theology and sacred Islamic law) have handed over the Island of Kish to China in exchange for cash and other commodities. Those mullahs have betrayed their faith. How can they stand idly by and not condemn the actions of the Chinese regime against the Uighurs, their fellow Muslims?

Revive western industry in the wake of the coronavirus

So far, President Trump and Boris Johnson have been the only world leaders to publicly denounce China’s inhumane treatment of Uighur Muslims and the repressive new Hong Kong security law. Details of the law’s 66 articles were kept secret from the public until after it was passed. The new law takes away many freedoms long enjoyed by the citizens of Hong Kong and criminalizes all forms of government protests, making them punishable with a maximum sentence of life in prison.

It is time for Europe, Canada, and Australia to follow suit and begin a total withdrawal of economic relations with China. The west must rebuild its industries in the wake of the coronavirus and secure their own economic futures and that of future generations. China will never truly be anyone’s ally; they will only exploit and steal. People everywhere should boycott anything that is made in China.

It should start by manufacturing all pharmaceuticals and medical supplies at home. It is an issue of national security that countries no longer rely on China for these lifesaving necessities.

In an effort to do just that, President Trump engaged the former film giant, Kodak to make pharmaceutical drug ingredients here at home. In a press conference announcing the deal, President Trump said, "We will bring back our jobs and we will make America the world's premier medical manufacturer and supplier."

<https://www.cnbc.com/2020/07/28/kodak-soars-another-40percent-after-trump-announces-deal-to-manufacture-generic-drug-ingredients.html>

Europe, the United States, and the Muslim and Christian world should come together and act now. As an Egyptian born Christian, I appeal to Muslims; stop buying Chinese made products. China currently has more than one million Uighur Muslims illegally incarcerated in so-called "education camps." Additionally, they are forcing the sterilization of Muslim women to eliminate future Islamic generations and end the existence of Muslims in China.

My criticism of the Chinese government is aimed exclusively at the regime, not the people. In no way is this a reflection of my feelings towards the Chinese people. Chinese immigrants are hardworking, family oriented, industrious people that contribute greatly to society. I have many Chinese friends, and I have great respect and admiration for them. Rarely will you find a Chinese immigrant that is dependent on government assistance, as they are a proud and hardworking people.

International Politics Topic One:

Three imbeciles could lead us into a nuclear third world war

President Putin did not need to attack Ukraine and NATO does not need a nuclear base in Ukraine; we will all pay a heavy price

Powers behind the scene wanted a war, it is all about money and power

Imbecile number one, Vladimir Putin. For starters, Putin is not a smart man. NATO set the bait and Putin took it. He made the same mistake as the former Iraqi President Saddam Hussein, allowing himself to be drawn into a doomed military conflict. Nuclear missiles can travel thousands of miles. Having them right on the border doesn't even matter anymore.

Imbecile number two, NATO Secretary General Jen Stoltenberg. There was no need for Stoltenberg to dangle Ukraine's possible membership into NATO like a carrot in front of Putin. Russia's invasion of the Ukraine could likely result in Europe's bankruptcy.

And last, but not least is imbecile number three, the weakest of them all, the inexperienced, ex-comedian Ukrainian President Volodymyr Zelenskyy. He was used by the other two imbeciles to initiate this senseless war.

These imbeciles need to stop their line of bullshit, saying "this is the price of war." They created this war, and they should be held responsible. Now Sweden and Finland are rushing to join NATO. President Putin is once again using threats but he is a poor poker player.

I am saddened for the innocent children who are suffering in this conflict

I blame these three imbeciles

Displaced and orphaned children belong to families not institutions

The Ukrainian invasion has displaced thousands of helpless children. SOS Children's Villages International Organization has confirmed the horrible effect this war has had on the children thus far. The constant shelling they have endured over the past many weeks has taken a significant toll. Many of the displaced and orphaned children have been taken to various institutions in Ukraine and Russia.

Only cowards and murderers like Putin and his army attack civilians and put innocent helpless children through such horrific misery; they will have their day of reckoning. Why are the Russian Orthodox and the Vatican Catholic Churches not publicly condemning these actions? Is this what a loving Jesus would have wanted?

China is giving two middle fingers to Europe by using their contrived new coronavirus lockdowns to purposely disrupt the supply chain Russia and Ukrainian exports of food commodities, oil, gas, coal, and other essential mining components are now stopped! What next?

A bankrupt Europe and a German industrial breakdown will end the European Union sooner than we think

Europe must speed up the reopening of its nuclear power stations and build more; Germany needs to follow France and the United Kingdom

China is exploiting the European conflict and giving them both their middle fingers. They have manufactured a crisis and are using their contrived new coronavirus lockdowns to purposely disrupt the global supply chain. The Chinese are taking advantage of the fact that exports of food commodities, oil, gas, coal, and essential mining components out of Russia and the Ukraine are currently halted as a result of the conflict. They have resurrected the coronavirus and created a phony crisis at home to intentionally cause further disruption to an already weakened supply chain. China is already hinting that their supply of any materials to the West will be cut by 90% in the next three months. They are creating a crisis under the guise of the coronavirus to initiate major new price hikes. In addition, a German industrial breakdown together with a bankrupt Europe will bring about a speedy end to the European Union as we know it.

Why is Ukraine called the breadbasket?

Ukraine's rich, dark soil and their vast fields of wheat and other food products have earned them the nickname "the breadbasket of Europe." According to the CIA World Factbook, Ukraine produced 25% of all agricultural output in the former Soviet Union. Russia and **Ukraine are Europe's breadbasket**; the International Food Policy Research Institute estimates that their exports represent 12 percent of all the food calories traded in the world. Mar 11, 2022

<https://wearechange.org/breadbasket-of-world-choked-off-by-ukraine-russia-war-as-wheat-prices-soar/>

In terms of world sunflower seed production, **Ukraine holds first place at 25 percent**, followed by Russia (22%) and Argentina (9%). In addition, around 57 percent of total world exports of sunflower oil come from Ukraine (State Statistics Service of Ukraine)

Why did Indonesia stop exporting palm oil? Indonesia has imposed a ban on palm oil exports **to increase domestic availability and check the rising prices of the commodity in that country.**

Why is there a shortage of olive oil? Why is there a cooking oil shortage? Unlike most recent product shortages - where issues have mostly been caused by supply chain disruption stemming from panic-buying, COVID or Brexit - cooking oils are running short **because of the Russia-Ukraine war.**

Is Italy running out of olive oil? The London Times reported that **Italy will run out of olive oil by April.** Italian farming lobby Coldiretti said that the domestic olive harvest last fall dropped 57% to 185,000 tons, a 25-year low. That's only four months' worth of olive oil

Which country is the biggest producer of olive oil producing over 38% of the world's total?

1. **Spain.** Starting with olive oil royalty, Spain has been producing quality olive oil for years. With a record of 1,059,194 tons of olive oil being produced from 1994 According to experts, **an olive oil shortage is on the horizon**, so if you can't live without it, you'll have to learn to make your own. Although traditionally made with an oil press, you can produce your own using simple kitchen equipment and appliances that you may already have.

<https://www.ipipotash.org/publications/eifc-310>

<https://www.newsnationnow.com/us-news/5-reasons-cooking-oils-may-get-more-expensive/>

What is the solution?

Russia

I am not a magician or a miracle worker. I am just a pragmatic average Joe. This has gone too far, and in my estimation, there is no more chance for reconciliation. Putin's army must be defeated at whatever cost to the United States and Europe. We can only hope his own military will take him out and save the world of all these miseries and murders.

China

It is time for the West to smarten up, and as I mentioned before, there needs to be a "Manufacturing Marshall Plan" implemented with an objective to do away with all dependence on China. China's strength could become its downfall as looming potential a real estate collapse could trigger its break-up. Today's dictatorship in Communist China has lost its way; you cannot mix communism with capitalism. All these millionaires and billionaires will eventually trigger a public revolt against the system.

As a wiseman once said, "You give capitalism one finger, next it wants your hand, next it wants your arm, then it will cut your head off. Capitalist success thrives on more wealth and more wealth.

United States

The U.S. has the wherewithal to achieve zero reliance on any, and all Chinese products through the implementation of a " Manufacturing Marshall plan." They must send a clear message to the Chinese that they will never again be in the position to be extorted by their actions. America is strong on all fronts, militarily, economically, and democratically. The West needs a stronger America to defend our freedom and way of life.

Europe

Europe has no other choice but to smarten up and look after their own citizens. They should start by making plans to survive for the next ten years of war with Russia. Their only hope is to bring back to Europe all of the manufacturing jobs they handed over to China. They should consider implementing a drastic measure and legislate a "traitor manufacturing act" that would ban any industrial dealings with China.

International Politics Topic Two:

China's latest coronavirus outbreaks are made up!

The Chinese are intent on destroying Western economies; shutting down Shanghai and Beijing is a red herring that was politically and economically motivated

China is exploiting COVID and the Russia/Ukraine conflict to weaken the West in their quest to become the dominant economic power in the world

The Chinese have created phony supply chain shortages

China is exploiting current events to achieve their ultimate goal of world domination. Disturbing images are emerging from China showing Chinese police officers clad in white personal protective clothing beating people into submission and forcing them into lockdown. China's mandatory lockdowns are nothing more than a big ruse. They are scamming the world and violating the human rights of their own citizens by fabricating large scale quarantines aimed at intentionally halting the production of goods in an effort to bring the Western world to its knees.

For years, China has been the world's largest exporter, producing more of the world's goods than any other country. But today, much of their production has come to a halt under the pretense of tough new COVID restrictions. The Chinese government has instituted strict new lockdown measures resulting in across the board shutdowns of their factories in hopes of crippling Western economies that rely so heavily on Chinese manufacturing.

Two reasons come to mind:

First, the political struggle between the two cities, Shanghai and Beijing needs to be reined in

Second, China is preparing the world for a major price hike

What is China trying to accomplish with all this? Very simply, they are intentionally causing a global supply chain disruption. The Chinese government has long wanted economic dominance over the entire world, and they will stop at nothing to achieve it. No tactics are too dirty for this godless regime. They are purposefully intent on inflicting both economic and physical harm to the West. They literally trample over their own citizens daily, why would they care about any harm they inflict on others. They don't care who dies or who suffers, so long as they achieve their ill-gotten desire to become the world's top economic superpower.

Five hundred coronavirus deaths in a country of 1.4 billion is a drop in the ocean and in no way, warrants shutting down two major cities. Even ten thousand deaths would not justify new lockdowns. We can expect prices to continue to rise so the cunning Chinese

regime can increase their profits and further weaken the already struggling Western economies. Is Chinese President Xi Jinping flexing his muscles? He is sending a message that he can shut down whole cities to quell some potential upcoming power struggle. The Chinese leader is telling the neo-liberal elites in Shanghai that under the new emergency powers they have ZERO power

Why is China shutting down Shanghai and Beijing for COVID?

Farmers in Jilin are prevented from planting their crops,

China is telling the world that coronavirus is affecting production and supply chains and prices must increase

It is a highly unusual move on China's part to shut down two major cities and prevent farmers from planting crops. Are Chinese authorities really worried about a new and deadlier strain of the coronavirus, or do they have something else in mind? By weakening the supply chain, they are hoping to inflict economic pain on the West. If they can cause inflation, which is already at 40-year highs, to go even higher, they will significantly increase their profits and gain more control over Western economies, which means more control over world economies.

I believe they have something nefarious up their sleeve. Time will tell if I am right or if I am wrong, but I do not believe COVID is the reason for their shutdowns. I think their next move will be to replace the valueless paper dollar with a gold standard Chinese backed currency.

The West has not been smart

China wants to bring the western world to its knees

It's time for the West to wake-up!

A "manufacturing Marshall Plan" is the only possible solution

Globalization has failed the West; only the greedy, controlling, and treacherous Silicon Valley and the World Economic Forum (WEF) billionaire club have benefitted

Monopolies in any industry are dangerous, but even more so when a country like China monopolizes much of the world's manufacturing. The COVID-19 pandemic shined a bright light on the dangers of the West's dependence on Chinese manufacturing, especially with regards to pharmaceuticals. The overwhelming majority of drugs consumed in the United States are made in China. But even the very few drugs that are still made in the West rely largely on China for the active pharmaceutical ingredient (API). Whether it's pharmaceuticals or any other type of manufacturing, China has all the power. So, with that power they fabricated a new COVID crisis in order to justify an unnecessary halt in

manufacturing and cause deeper supply chain disruptions, further tightening the noose they have wrapped around the necks of every major Western economy.

Western nations like the United States, Canada, Australia, and Europe have been making very idiotic concessions to China over the past 30 years. What did they do that was so bad? For starters they have outsourced the majority of their manufacturing to the Chinese. They have handed over control of their technologies to a country that wants to pummel them into submission. Because of Western stupidity, China now controls 98% of the world's rare earth, meanwhile the West continues to kowtow to China's demands for access to their intellectual properties. Is there anything more stupid than that?

Taking their stupidity a step further, in exchange for doing business there, Western countries continually bow to China's demands for censorship. Western companies have routinely punished employees that said anything critical of the Chinese regime on social media, ordering them to remove tweets and refrain from sharing their personal opinions about China or its actions against Taiwan and Hong Kong.

A "**Manufacturing Marshal plan**" is needed in order to take back all the manufacturing jobs and technologies the West has so foolishly handed over to the Chinese. Vaccine and climate change scams are destroying our western economies. Billions and billions have been needlessly spent on ineffective scams. They must be stopped, and our focus should instead be on reviving our manufacturing industries that were stolen by the Chinese. The west must reinvent themselves and move forward with new innovative manufacturing processes such as nanotechnology next step, artificial intelligence, and cutting-edge pharmaceuticals.

https://ceocfointerviews.com/pdfs/Emil_Malak-Climate_Change_Op-ed_081021.pdf

https://ceocfointerviews.com/pdfs/Emil_Malak_Op-ed_COVID_031021.pdf

How should the West respond?

Western countries need to be self-sufficient once again and manufacture their products domestically, even if it costs them more in the short-term. In the overall scheme of things, it will be far better to pay a little more and provide workers with a decent job than to be held hostage by Russia and China.

Today, Serbia's stupidity is giving China's Zijin their largest copper mine ever, and Croatia is awarding China CRBC the 2.4 km bridge linking Croatia to Europe.

Of course, China is winning all the bids because they are subsidized by the Chinese government and putting our highly regarded engineering jobs at risk. One must wonder how much money the corrupt Chinese government officials have had to pay to get these contracts. It is time to wake-up and nationalize all Chinese owned companies in the West and send them back.

Communist government in Italy signed an infra-structure deal with China. Now, Chinese people own 27% of foreign investments in Italy representing about 300 companies that employ almost 18,000 people and produce 8.4 billion € of GNP. Italy signed a preliminary

accord with China on Saturday and became the first country of the Group of Seven industrialized nations to join the Chinese Belt and Road Infrastructure Project.

Italy is now handing over all its technologies to China. How stupid, and how sad is that? Such a giant industrial country is now a slave to the Chinese.

We can start by imposing heavy taxes on all Chinese exports and providing tax breaks to companies to spur on the revitalization of domestic manufacturing, rebuild western industrial enterprises and jumpstart western economies. To do this effectively, a well-designed "Manufacturing Marshal Plan" needs to be developed. It should include large tax breaks and allocation grants for the rebuilding of all industries.

Sadly, globalization has only served the interests of China and the Silicon Valley. The rest of the world, and in particular the West has been seriously harmed by it. It is time for the United States and Europe to work together and draw up a similar program to the Marshall Plan developed after the second world war. It would be geared towards bolstering the recovery of the current economy that has been depressed and taken over by the Chinese, like was done for Japan in the aftermath of WWII and Hiroshima. China must pay the consequences for their attempts to destroy western economies. Rebuilding domestic manufacturing in the West would cripple China's economy and take away the dangerous stranglehold they have on the rest of the world.

International Politics Topic Three:

Europe will be bankrupted by a prolonged Ukraine conflict

Europe is headed for a long, hot war with Russia and towards economic disaster

On top of the Ukraine/Russia war distraction, let's not forget the colossal ongoing economic losses of COVID-19 and the contrived Chinese supply chain problems

Europe has begun a serious economic decline; a bankrupt future is in store for Europe and will put the Euro into free fall

A simple geo-political lie by Russia

The entire Putin regime is only interested in keeping their political careers alive. Their actions have nothing to do with protecting Russian speaking people. Ukraine will never be allowed to become a full-fledged democracy or join the European Union. Russian

autocratic and dictatorial politicians cannot afford to have a democracy on their doorstep that could eventually spill over into Russia and threaten their hold on power.

Ukraine is the most corrupt country in Europe. Their politicians are nothing but a bunch of thieves that cannot be trusted to administer billions of dollars in humanitarian aid. We should not give their government a single cent. Instead, the West should control the purse strings and administer all grants to ensure the monies get to the intended targets.

Ukraine's President Zelensky and NATO are to blame for initiating the war

What can the Ukrainian people expect from an ex-comedian and dancer? A war! Sadly, they got what they deserved for electing a man with zero leadership experience. They put a man in charge of their country who has never run a business or had any previous political experience, but somehow thought he would be capable of leading Ukraine into the future. This imbecile seriously misplayed his hand. He came out threatening Russia expecting that he could wave his fists at them, and NATO would just come to the rescue if Russia tried anything. But NATO tricked this inexperienced idiot and let him taunt Russia with the possibility of putting nuclear missiles on the Ukrainian/Russian border. Putin answered with a pre-emptive strike against Ukraine to prevent NATO missiles from being pointed at them, and the world quickly blamed Russia. As I pointed out before, in my opinion Russia had no option but to attack Ukraine; however, the weak Russian military has shown its evil cowardice by attacking civilian targets. No one can condone those actions.

France and Germany's appeasement of Russia in Georgia; history is repeating itself

The intensity of that new focus was shown in 2008, when Russia entered the Georgian breakaway territories of South Ossetia and Abkhazia and then invaded Georgia itself, catching US intelligence completely off guard. Russia accused Georgia of "aggression against South Ossetia", and launched a large-scale land, air, and sea invasion of Georgia on 8 August under the pretext of conducting a "peace enforcement" operation. Russian and South Ossetian forces fought Georgian forces in and around South Ossetia for several days, until Georgian forces retreated.

A weak NATO and Europe appeased Russia once again with Crimea, history is repeating itself once again

On March 18, 2014, Russian President Vladimir Putin signed the treaty of accession with Crimean leaders in Moscow. During February and March of 2014, Russia had invaded and subsequently annexed the Crimean Peninsula from Ukraine. This event took place in the aftermath of the 2014 Ukrainian revolution and is part of the wider Russo-Ukrainian conflict

Today, the West must learn from history; Russia cannot be permitted to take one inch more from the Ukraine

The Ukraine invasion marked the end of Cold War and the start of a Hot War in Europe

Russia must be defeated at all costs, or Europe will be at war for years to come, and history will again repeat itself resulting in a third world war

Russia invaded Ukraine on February 24, 2022, marking a steep escalation of the Russo-Ukrainian War, which began in 2014 following the Ukrainian Revolution of Dignity (Maidan). If Putin is allowed to win and occupies one inch of Ukrainian territory, he will be emboldened and will continue to move further into Europe. The Ukrainian conflict signifies the end of the Cold war and the start of a European Hot War.

President Putin and his Foreign Minister's threats to use nuclear weapons are a sign of panic and weakness; they are bluffing!

Does President Putin believe for a second that the West would not retaliate in the event Russia were to launch a nuclear attack on any country? He is wrong if he thinks that. If he initiates a nuclear attack on anyone, he is in essence launching a nuclear attack on his own Russian Federation.

<https://www.foxnews.com/world/foreign-minister-putin-nuclear-weapons-existential-threat>

Germany needs to form a military force to protect its borders against a future threat by Russia. The United States and Western Europe should assist Germany in every way possible. The time for peace is gone; it is now time to prepare for the possibility of war.

**Will the United States and Europe eat humble pie and bow to Russia?
Doing so would be a grave mistake**

Many weak politicians and peace dreamers are already calling for a deal with Russia. They propose letting Russia keep the territories it has gained from the Ukraine, then demilitarize the Ukraine and give Russia assurances that NATO will never admit Ukraine.

Weak western leadership is going to lead us right to a future World War III

Is President Putin normal? His behaviour is extremely worrying. Only an unbalanced egomaniac, or extremely physically sick person, or both would do and say some of the things he has done and said. Even during the Cuban missile crisis, Nikita Khrushchev never made any of the wild threats we have heard come from Vladimir Putin. Killing innocent Ukrainian civilians is despicable and cowardly and must be met with serious consequences.

One expert warned, "Vladimir Putin's terrifying arsenal of nuclear weapons could obliterate nine UK military bases within 20 minutes amid soaring tension with the West."

After the U.S. announced plans to pull out of a key arms control treaty, Putin threatened to target the U.S. with nuclear-tipped missiles capable of quickly striking the continental United States. Speaking at his annual news conference in December 2018, Putin warned that "the danger of the situation is being downplayed". He went on to say that an arms race could "lead to the collapse of the entire civilization and maybe our planet".

A February 2022 news article wrote, Amid the Russia-Ukraine war, Kremlin leader Vladimir Putin has openly brandished the threat of using nuclear weapons against the western powers if they try to stop Russian invasion of Ukraine.

International Politics Topic Four:

Watch out for possible coronavirus long COVID injuries

Severe COVID vaccine injuries are being underreported by a factor of 40

Is long Covid becoming a problem for the vaccinated?

Is it criminal to continue COVID vaccinations following new revelations out of England's Office of National Statistics?

The Hague International Court of Justice must investigate!

COVID-19 vaccines are all about money; our health does not matter

The Office for National Statistics in England has just revealed the biggest cover-up of the 21st Century. A new study of VAERS data found that COVID-19 vaccination increases the risk of stroke by 11,361%. Health authorities and scientists worldwide that continue to push the experimental vaccine narrative should be held responsible in court for the damage and injuries their actions have caused.

Why do these dangerous vaccines continue to be promoted? It is flat out criminal to continue coercing people into taking booster doses despite these latest statistics. Could the coronavirus vaccine manufacturers be held responsible? And why are they promoting the vaccine for use among small children? The pharmaceutical companies and health authorities that do this are in it exclusively for the money and do not care one bit about who they hurt so long as they keep raking in their profits. They have no conscience! These dangerous vaccines must be stopped now! We are in for a serious, future global health crisis as a result of their actions.

<https://expose-news.com/2022/05/02/study-covid-vaccines-increase-risk-stroke-11361percent/>

<https://expose-news.com/2022/05/09/confidential-pfizer-docs-90percent-pregnancies-miscarried/>

The Office for National Statistics in England has revealed that between January 2021 and March 2022, a total of 69,466 people died within 28 days of COVID-19 vaccination, and 109,408 people died within 60 days of vaccination.

<https://expose-news.com/2022/05/19/70k-dead-28-days-covid-vaccination/>

<https://www.ons.gov.uk/file?uri=%2fpeoplepopulationandcommunity%2fbirthsdeathsandmarriages%2fdeaths%2fdatasets%2fdeathsbyvaccinationstatusengland%2fdeathsoccurringbetween1january2021and31march2022/referencetable20220516accessible.xlsx>

Additionally, the Office for National Statistics has unintentionally revealed that children are 82 to 303x more likely to die following Covid-19 vaccination than children who have not had the Covid-19 vaccine.

<https://expose-news.com/2022/05/20/kids-death-risk-increases-8100percent-covid-vaccination/>

<https://www.ons.gov.uk/peoplepopulationandcommunity/birthsdeathsandmarriages/deaths/datasets/deathsbyvaccinationstatusengland>

This data is straight from ONS per Freedom of Information Act requests, and it is absolutely damning. Today in Canada, the dictator prime minister Justin Trudeau and his government are not backing down from their insistence on vaccine passports despite these latest statistics. As an unvaccinated Canadian, I and millions like me cannot board any commercial airplanes, trains, marine vessels. We are being held prisoners in our own country. While countries all over the world have either modified or completely eliminated strict COVID travel restrictions and requirements, Canada has yet to budge. They will not even accept a current PCR-Covid test in lieu of the vaccine. This new form of coercive government in Canada is an affront to freedom and democracy. Millions of us unvaccinated Canadians that exercised our right to refuse their untested vaccines are being punished for daring to make decisions about our own health.

California, Canada, Israel, and Chile had the highest vaccination rates; now they have the highest Omicron infections

A new report shows vaccines are responsible for issues with the heart, stroke, fatigue and organ failure

Is all this the result of the vaccines causing endothelial inflammation of the lining of the cell walls in the blood vessels?

Are the more than 5.1 billion people that have received at least one dose of the covid vaccine at risk for long covid injuries?

Why do so many in the scientific community remain silent? When will more true scientists stop fearing and begin to speak out?

New report topics:

Researcher: 'We Made a Big Mistake' on COVID-19 Vaccine

https://www.theepochtimes.com/researcher-we-made-a-big-mistake-on-covid-19-vaccine_4469331.html?utm_source=healthnoe&utm_campaign=health-2022-05-17&utm_medium=email&est=KTFpOFSBKLR3A%2BQtwkoa7c9gVVmbK%2F902%2F0mvYGYrPYfvRXT3LmdvrqUf%2BI8OCOyxCU%3D

The Vaccine Adverse Event Reporting System (VAERS) is a national reporting system to detect possible safety problems in U.S.-licensed vaccines. VAERS is co-managed by the Centers for Disease Control and Prevention (CDC) and the U.S. Food and Drug Administration (FDA). VAERS accepts and analyzes reports of adverse events (possible side effects) after a person has received a vaccination. Since VAERS reporting began in

1990 there have been a total of **2,108,012** total adverse events reported to VAERS for all vaccines. Shockingly, more than half of all those reports, **1,237,645** were directly related to the coronavirus vaccines. Since 1990 there have been **36,724** total reported deaths to VAERS, **27,349** of them were reported as a result of COVID Vaccines.

These alarming numbers alone are reason enough to immediately halt all COVID vaccines. But as if we needed more proof, now a new report is expected out soon claiming that severe COVID vaccine related injuries are 40 times more likely to go unreported. Doctors are not making the connection between serious illness and incidents and the coronavirus vaccines. Additionally, reporting on VAERS is painstakingly cumbersome. The reporting usually process takes more than an hour for which no one gets paid, and doctors and healthcare workers are reluctant to take the time to file the report. As I have been saying all along, one day the truth will come out and it will not be good.

<https://covidcastaways.org/vaers-data-covid-vaccines-vs-other-vaccines/>

The World Health Organization (WHO) just confirmed over 15 million deaths from COVID. Scientists who supported vaccines that failed to stop transmission of the virus seem to conveniently avoid the larger problems of what has happened to vaccinated people who contracted COVID and became seriously ill in the short, medium, and long term. Many have suffered serious complications like organ failure, and systemic endothelial cell dysfunction which can cause heart attacks, strokes, and brain damage.

All COVID infected patients should be tested regularly to check their endothelial inflammatory markers in order to assess if there is any damage. It is apparent that the vaccinated are experiencing much more serious inflammation than the unvaccinated. It's time to come clean and stop hiding and manipulating data.

New COVID-19 cases in the United States seem to be trending upward once again in recent weeks. There needs to be truth and transparency if we are going to be able to help coronavirus patients, including those suffering the effect of long COVID. For now at least, the mutations seem to be limited to higher rates of transmission and less serious infections. The question is how long before we see a deadlier mutation emerge?

<https://www.cnn.com/interactive/2020/health/coronavirus-us-maps-and-cases/>

COVID-19 will seem extremely mild if H5N1 becomes the next deep lung disease

Could H5N1, Avian flu recombine with Influenza and become contagious?

The deadly Spanish Flu pandemic of 1918 (as well as many subsequent pandemics) originated from H1N1, which was derived directly from an avian influenza virus. Now there is a new strain of the avian virus, H5N1 which has crossed over into the human population, albeit in isolated cases to this point. So far there have been two reported cases among humans, the first was in the United Kingdom and the second in the United States. Fortunately, it has remained in the bird population and has not been widely transmitted from person to person. It is feared that if human cases do emerge at some point in increasing numbers, the H5N1 virus combined with influenza could result in deadly deep lung inflammation among infected humans.

One major problem with human infection of H5N1 is an increased mortality rate. The rate of death increases by 61% in humans and unlike other flu viruses, this one seems to affect younger people more than older ones. Generally, young people have an active and robust immune system which ironically is the reason why the H5N1 is deadlier with the younger generation as opposed to older people who have a much weaker immune system. Interestingly, the 1918 Spanish Flu resulted in a higher number of deaths among young soldiers infected with the flu than the total number of World War I casualties.

H5N1 Avian flu, Spanish Swine flu and other influenza strains belong to the same family

Could Influenzas in humans recombine with H5N1 spelling a disaster in waiting for humanity?

Could a rogue country or organization use such a combination as a biological weapon?

As previously mentioned, the CDC just reported the first U.S. case of H5N1 infection in the state of Colorado. Both the U.S. and British cases reported only mild symptoms and made full recoveries. As of now there is no acute danger, however close monitoring must continue.

The most worrying scenario is the possibility of H5N1 mutating and jumping from birds to humans infected with influenza; potentially creating a brand-new variant. Once a genetic recombination is formed, the mutation becomes deadlier and more contagious among humans. It could become airborne and take just a few days to incubate causing asymptomatic spread.

H5N1 symptoms are similar but more lethal than COVID, potentially triggering deep, cascading lung inflammation that could kill up to 61% of infected people. Overall, there is an urgent need to understand the pathogenesis and immunity of AIVs in humans, especially for those strains that can cross the host barrier to humans. “ (Wang et al., *Frontiers Immunol*, 2016 doi: 10.3389/fimmu.2016.00060; from an Australian group).

As I have called for on many occasions, there must be a focus placed on developing a therapeutic cocktail that will modulate all the bad actors that cause the immune system to overreact and lose control.

Is COVID back despite so many vaccines and boosters?

The vaccines have failed, and now vaccine injuries are starting to surface

It's time to admit to mistakes and immediately stop this vaccine scam!

Many Scientists are still supporting the continuation of boosters even though vaccines have proven to be ineffective against Omicron. Sadly, the concealing of facts by some health authorities has been normalized and is now commonplace since the coronavirus pandemic began. Science must value the truth because the truth comes out at the end. The coronavirus has been politicized by scientists, and as a result no one is talking about the growing alarming numbers of various vaccine related injuries.

It is believed that vaccinated people are getting infected with Omicron and BA.2 just as much as unvaccinated. Alarmingly, it is the vaccinated that are getting much sicker and taking longer to recover than the unvaccinated. Scientists need to get back to true and tried science. We are the ones left to pay the heavy price because true science has been diminished. It is criminal that western health authorities continue to hide the true numbers of COVID vaccine related injuries. Eventually the hundreds of millions of vaccinated people suffering from the effects of vaccine related injuries will be unstoppable. Scientists need to get back to true, verified science, and must stop meddling in politics. Besides the great harm they cause to the public, they are also losing credibility and bringing great scientific institutions into disrepute.

International Politics Topic Five:

It is essential that judges be protected against all threats, intimidations and attempts to influence them in the discharge of their duty

Demonstrations must never be permitted to take place outside of judge or politician's' home; a private residence must be off limits to public protests

Stop murdering unborn babies!

According to the WHO about 73 million babies are aborted each year worldwide

Almost one million unborn babies are murdered in the USA yearly

Why are pro-abortion women so passionate about killing a helpless unborn baby?

According to the WHO, about 73 million abortions take place each year worldwide. That unborn baby is not an extension of the mother. It is not a clump of cells as abortionists argue. It is a separate human being with a unique DNA living inside of the mother until it can survive outside of the womb. The unborn child is a living person whose life should be protected.

At just five weeks gestation (about three weeks after conception) an unborn baby is about 5mm long with a heart beating quickly and rhythmically and would appear like a tiny bright dot on an ultrasound which isn't usually done at this stage.

Your developing fetus has already gone through a few name changes in the first few weeks of pregnancy. Generally, it's called an embryo from conception until the eighth week of development. **After the eighth week**, it's called a fetus until it's born.

<https://my.clevelandclinic.org/health/articles/7247-fetal-development-stages-of-growth>

Our actions have consequences. Engaging in sexual relations also has consequences. When a couple conceives a child, they need to take responsibility for their actions. If that baby is unwanted by the parents, it's not the baby's fault. Why kill the innocent child that did not ask to be created? Abortion laws make it so easy for people to absolve themselves of any responsibility for the pregnancy they caused by allowing them to callously murder the unborn child and terminate the pregnancy.

They dehumanize the unborn to justify ending its life. The situation is worsening. Today we are seeing new, more broad abortion laws being passed that dehumanize the baby even after birth. A pregnancy creates a separate human being than the mother. It is not the mother's body; it is the body of a helpless unborn baby that is dependent on its powerful mother not just during the pregnancy but for many years after birth.

This has nothing to do with denying a woman her rights. It has to do with protecting a helpless unborn child and denying the mother's ability to legally murder her unborn baby. This is not about passing laws that are against women; this is about using the law to stop women from murdering their unborn child.

Will the Supreme Court overturn Roe v Wade?

I hope the rumors are true and the Supreme court will make the right decision and overturn the dreadful Roe v Wade. Such a decision is not about politics, or right vs. left.

It is not Democrat, Socialist, Republican, liberal or conservative. It is about our conscience and doing the right thing.

Birth control pills, condoms, and many other forms of contraception all prevent women from getting pregnant. Irresponsibility should never result in the murder of an unborn baby. Once a woman is pregnant, she has two lives in her body, hers and her baby. The law must protect babies from being murdered.

Why are some religious institutions like the Vatican not openly expressing their support for the leaked Supreme Court decision? An intentionally leaked draft of a majority opinion of the Supreme Court decision authored by Justice Samuel Alito was published Monday by Politico indicating that the Supreme Court would overturn Roe V. Wade.

What we should be asking our conscience is simple, does any woman have the right to terminate a life that started in her womb? And how can we live with ourselves as a society as we allow terrible new laws to be passed allowing very late term abortions, even in the third trimester? In my opinion that is murder against a helpless baby that can do nothing to defend itself. The baby will always choose to live than to be murdered.

People that advocate for abortion always bring up rape as a justification for abortion. First, let's be clear that of all the millions of abortions that take place each year, only about 1% of those conceptions were a result of rape. That means rape was not a factor in 99% of all abortions.

But it begs the question, was the rape the fault of the unborn baby? The bottom line is that getting an abortion will not make the pain of the rape go away. Killing an innocent baby is never right, regardless of how that baby came to be. So many wonderful families would be happy to adopt, pay the mother thousands of dollars, and give that baby a good home. That unwanted child may just grow up to be someone very special. Perhaps a doctor, an engineer, or an inventor. Maybe even a president.

<https://www.who.int/news-room/fact-sheets/detail/abortion>

<https://christianliferesources.com/2021/01/19/u-s-abortion-statistics-by-year-1973-current/>

Hypocrites! It's all about votes

Pro-abortionist love to shout out loud lines like:

“My body, my choice!”, and “I can do whatever I want to do with my body!”

First of all, it is not their body. When a woman becomes pregnant, she shares her body with another human being that has its own DNA. It is a helpless child that needs the care and protection of the mother beginning in the womb and for many years after birth.

Hypocritically, the loud politicians that proclaim that pregnant women are free to do whatever they want with “their bodies” were the same ones telling us we did not have a

choice to do what we wanted with our bodies regarding the COVID-19 vaccines. They are the ones that voted for mandates, and vaccine passports to force us into taking an unproven, experimental vaccine. We were not given a choice. They tried to punish anyone who dared resist the vaccine. In their eyes “my body, my choice” only applies to killing babies.

These are the same people that want to crucify anyone that disrupts turtle eggs on a beach. Sea turtle eggs are protected under the law. Anyone that interferes with them is charged with a felony and subject to a \$5000 fine and five years in prison. I love animals and nature and I think this is a good law. We should protect helpless creatures. But it's ironic the great lengths we go to protect an unborn turtle but are so intent and quick to want to dismember an unborn human baby.

Shame on these hypocritical politicians. Where have they buried their consciences? Perhaps in the same coffins as the millions of aborted babies!
